

We support your research!

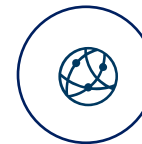

GenFollower Biotech CO., LTD.
Company presentation 2017-5

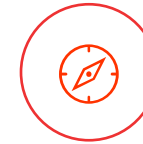

Established in China

GenFollower Biotech established in Shaoxing City in the eastern China. The city is near a seaport that's why the process of exporting our products to other countries is carried out more efficiently and effectively. We have been providing our customers with the most affordable prices and shipping charges for 2.5 decades now. Also, our location is suitable for local shipping such as to Shanghai or Ningbo that takes only two hours from Shaoxing city.

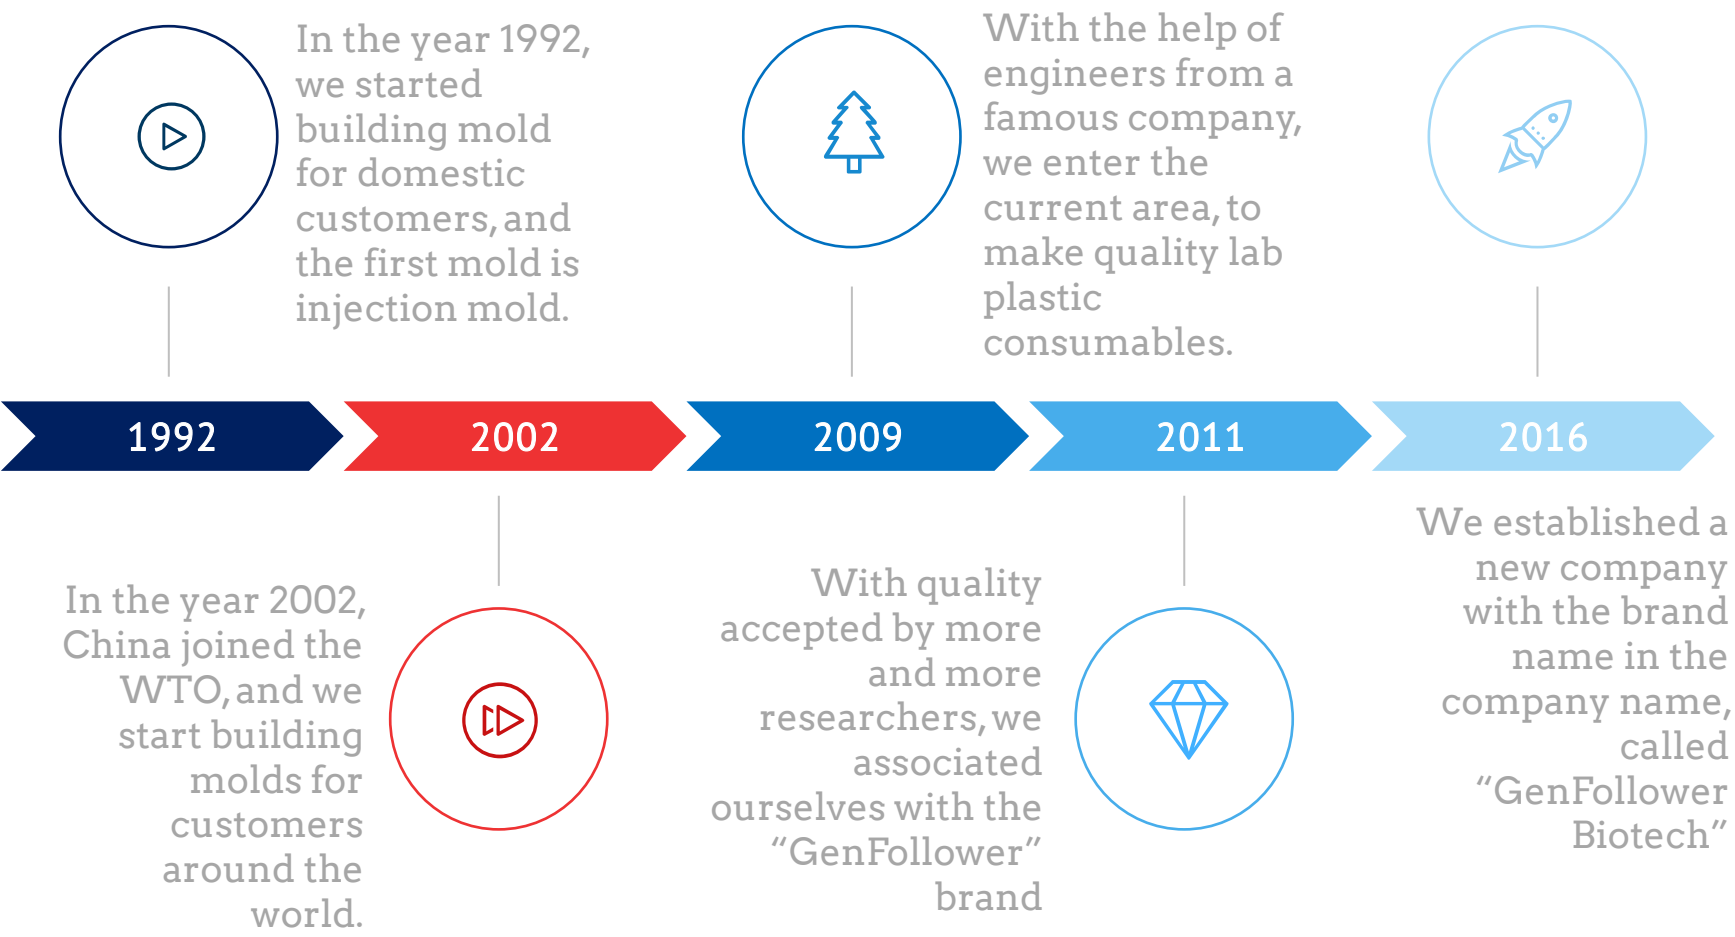

Convenient
transportation

Long history
on exporting

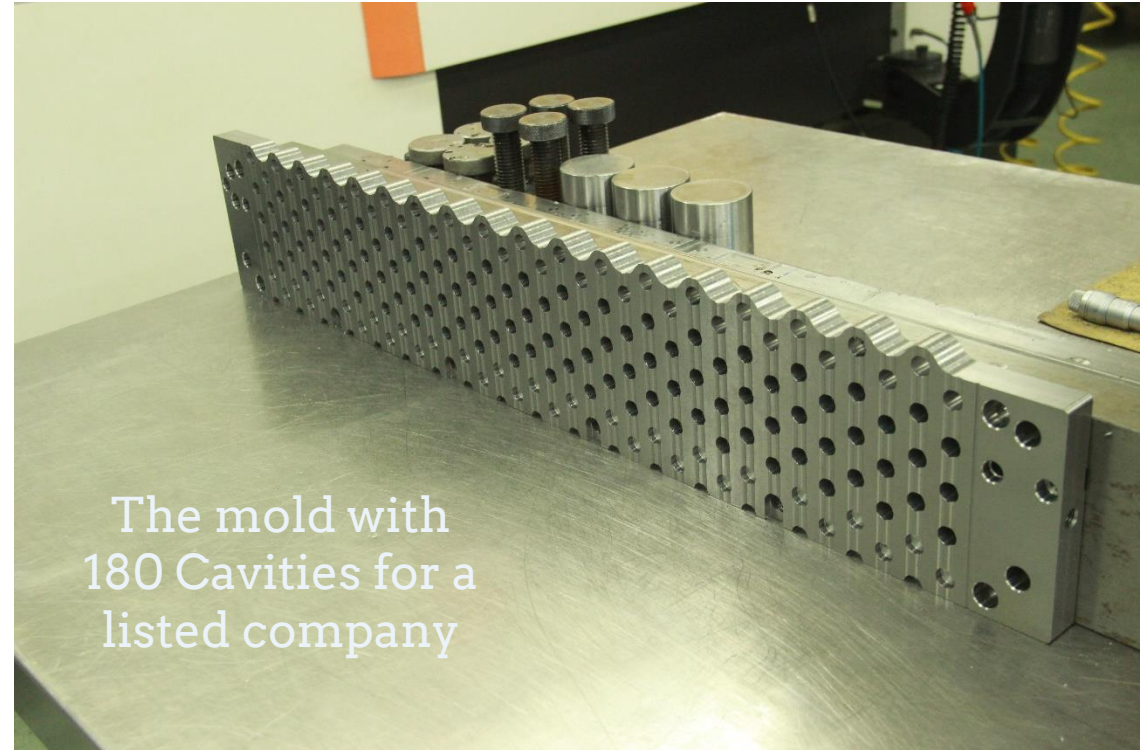

Experienced
labors

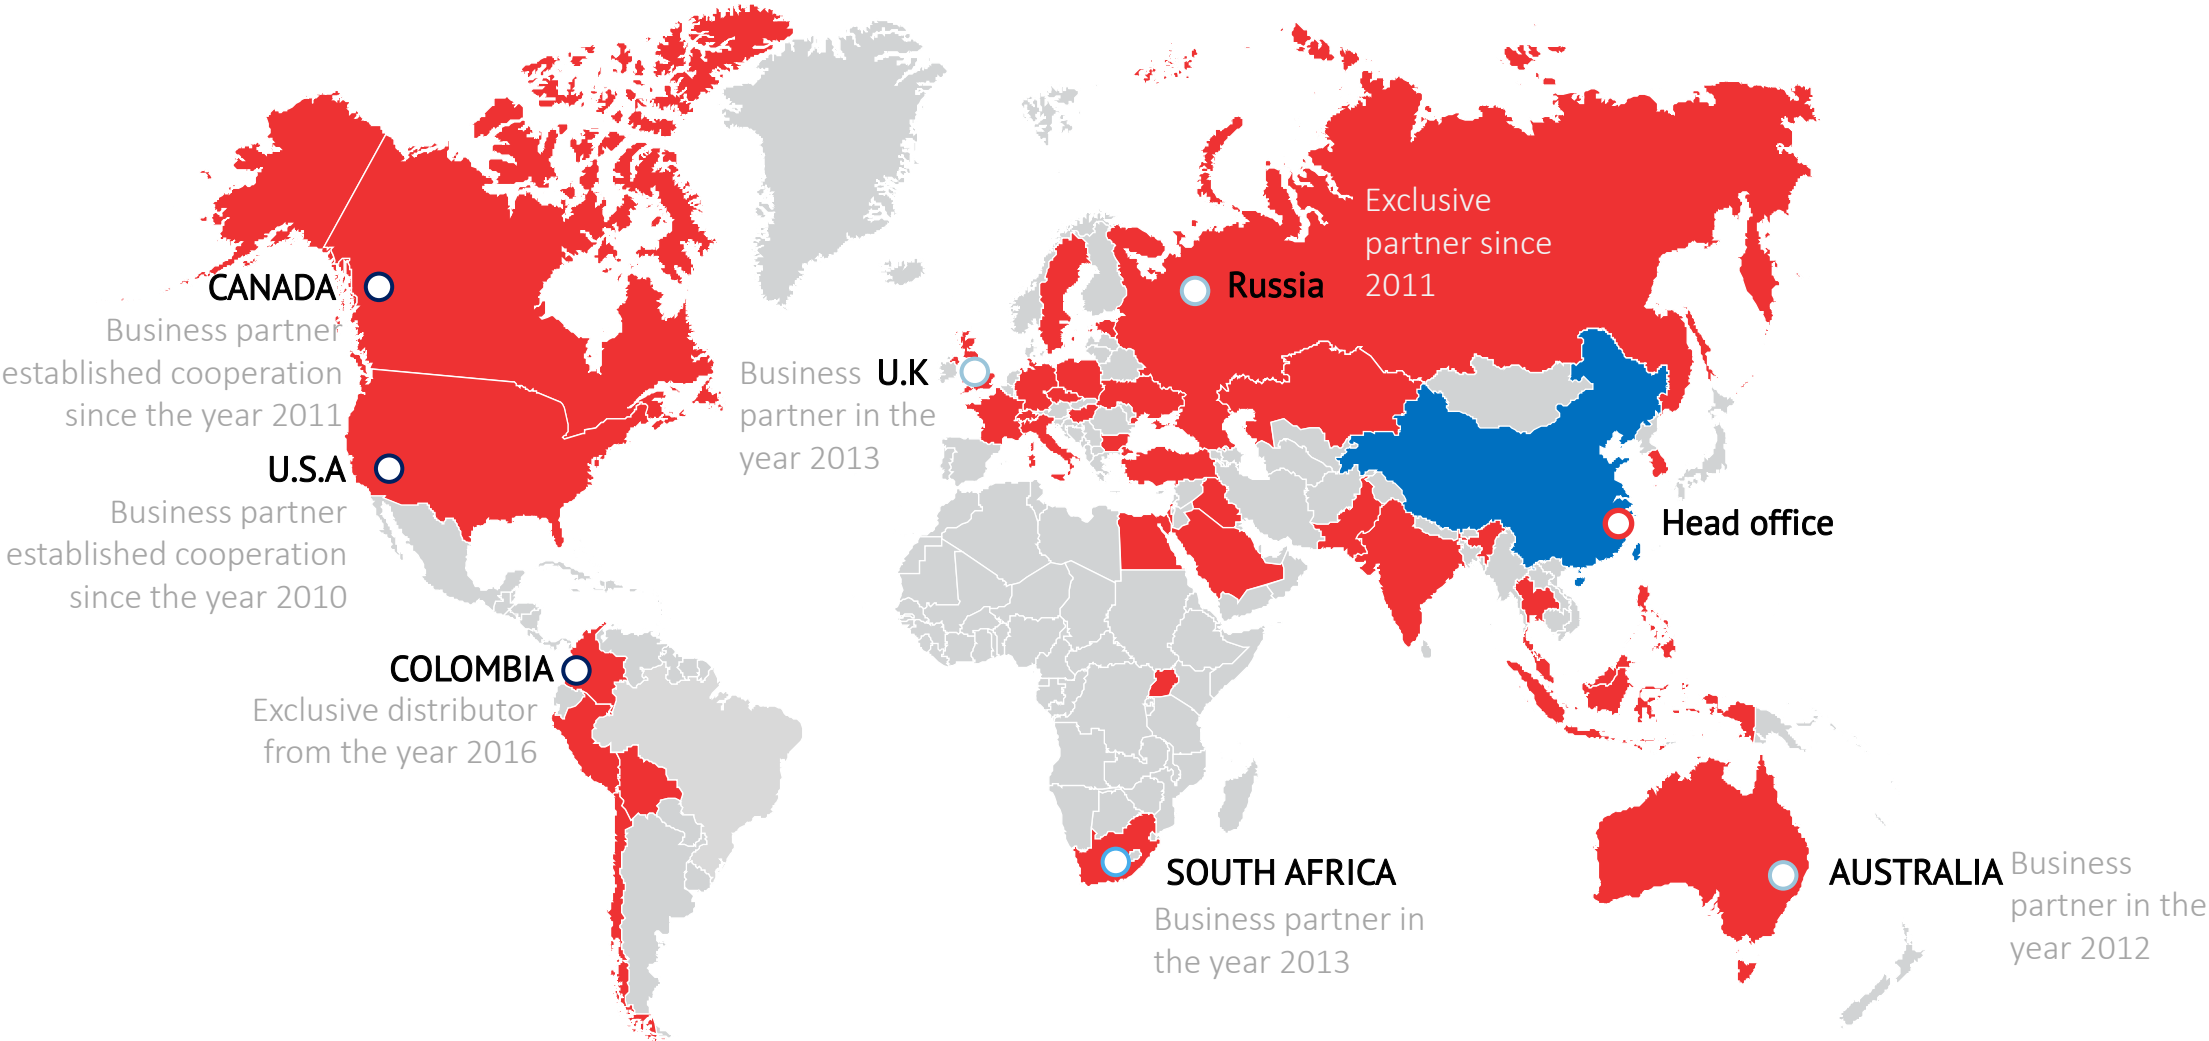

We have experts in our team, although GenFollower is new to the researching world. We have been supplying the best quality products since the first day due to the presence of experienced molding engineers from the beginning. Quality over quantity is what we believe in and have always followed.

Currently, We pride ourselves in having partners in over 50 countries including USA, Germany, Switzerland, South Korea, Italy, England, France, Russia, Canada, and more.

The mold with
180 Cavities for a
listed company

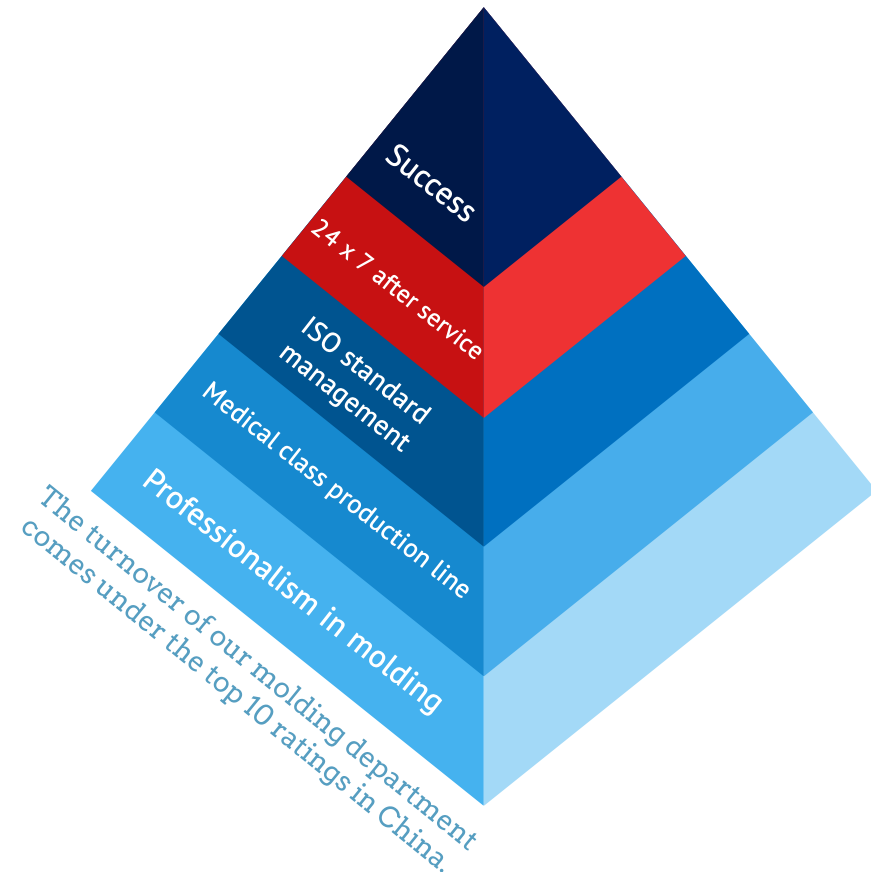

Now we have partners in more than 50 countries or areas

As mentioned, our professionalism in molding is the base we grow faster than our competitors.

The 25 years experience serves as an add-on to us that enables us to deliver error-free and timely delivery. Even though we have achieved the brand name only seven years ago, our experience in molding is a quarter of the century old. Therefore, we always surpass our competitors, efficiently. We started off as a small area that has now grown up to 2000 square meters workshop for molding where 50 experienced engineers work at once.

Certainly, we have more advantages to reach success.

Leakage checker

The certificates we own

ISO 9001: 2008
Management standard

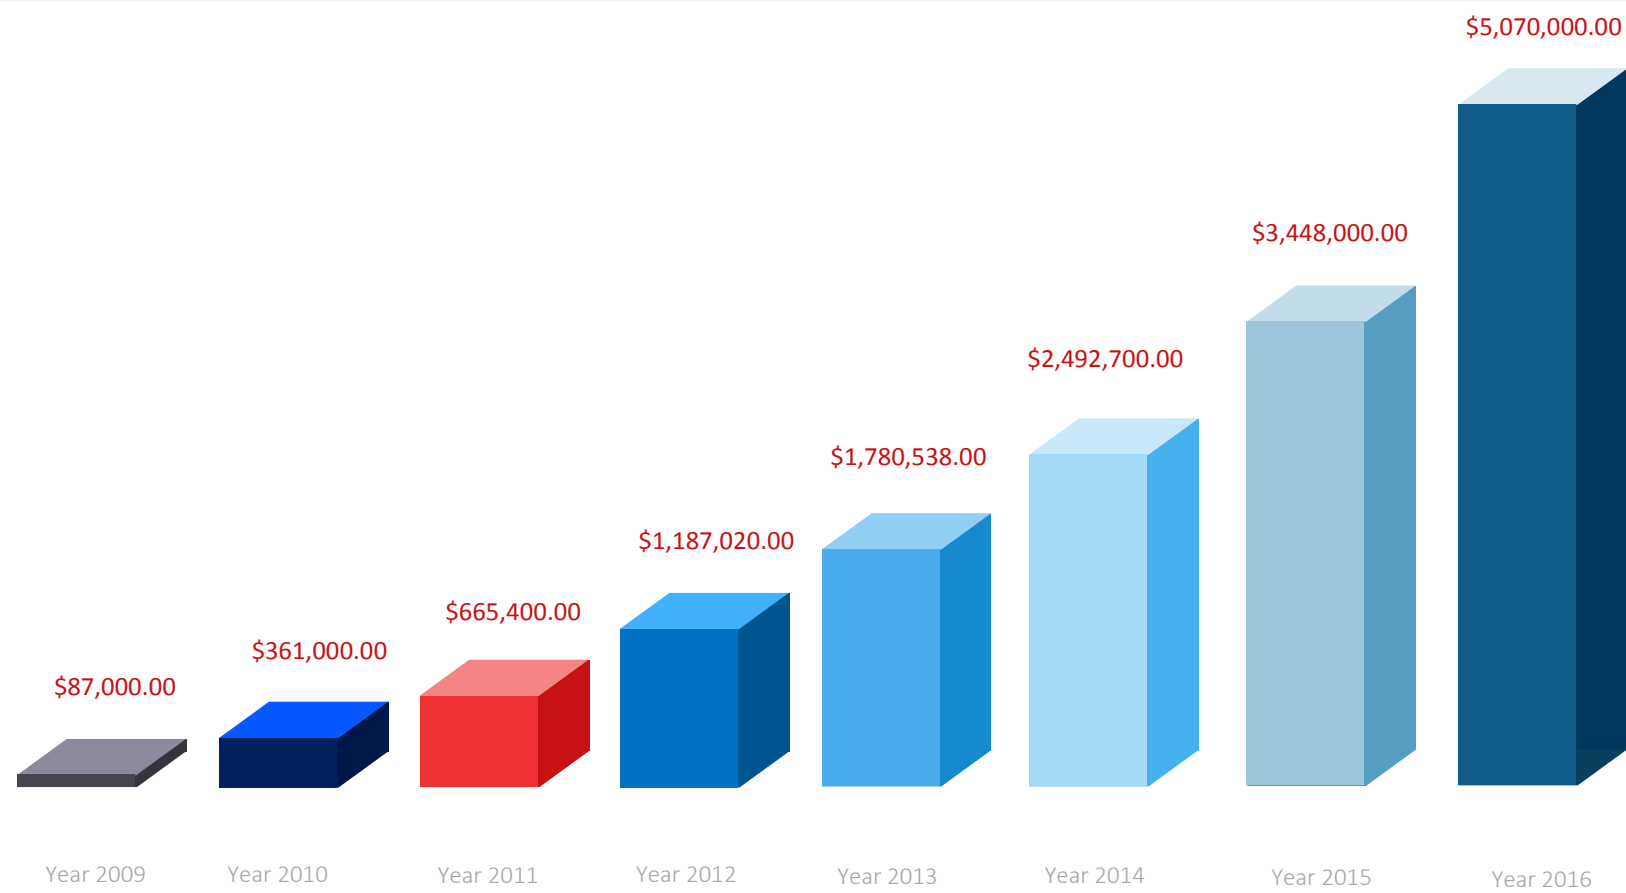

CE certificate
For Europe makret

We understand in-time communication is very important in multinational cooperation, so we are providing 24 x 7 service

Turnover of past years

Since the year 2009, our annual sales amount is increasing more than 30% each year, The turnover of the year 2016 is more than \$5,000,000.00, which shows 40% growth from the previous year.

BUSINESS from our own Brand

Currently, 43% of our business is from our distributors of brand "GenFollower", and the ratio is increasing year by year.

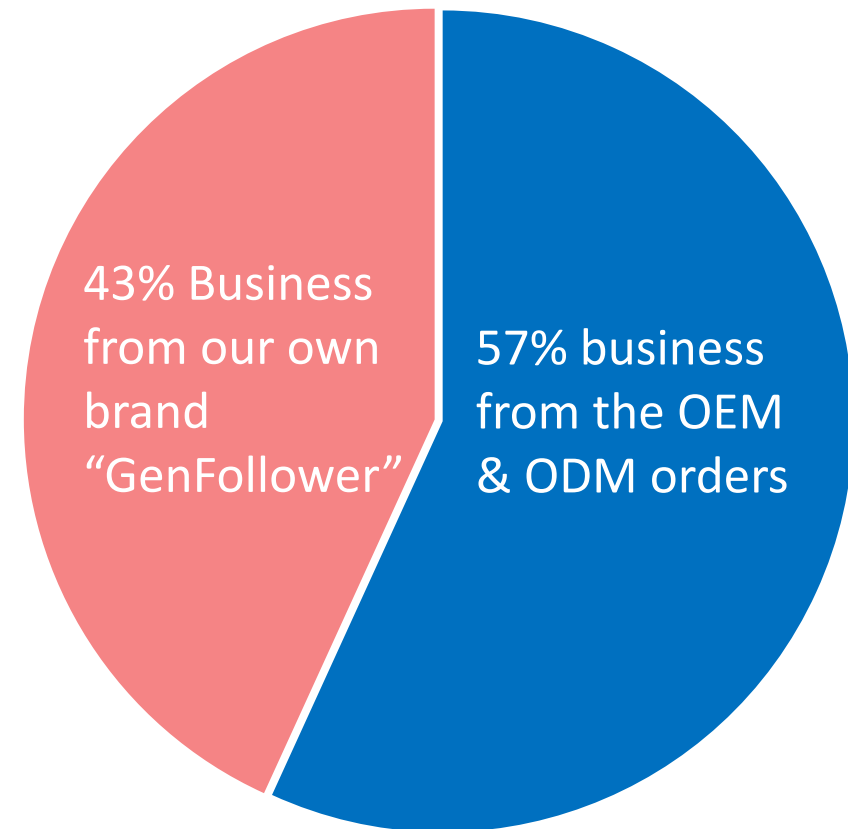

OEM business

OEM orders are taking the largest ratio of since we started current business for plastic lab consumables.

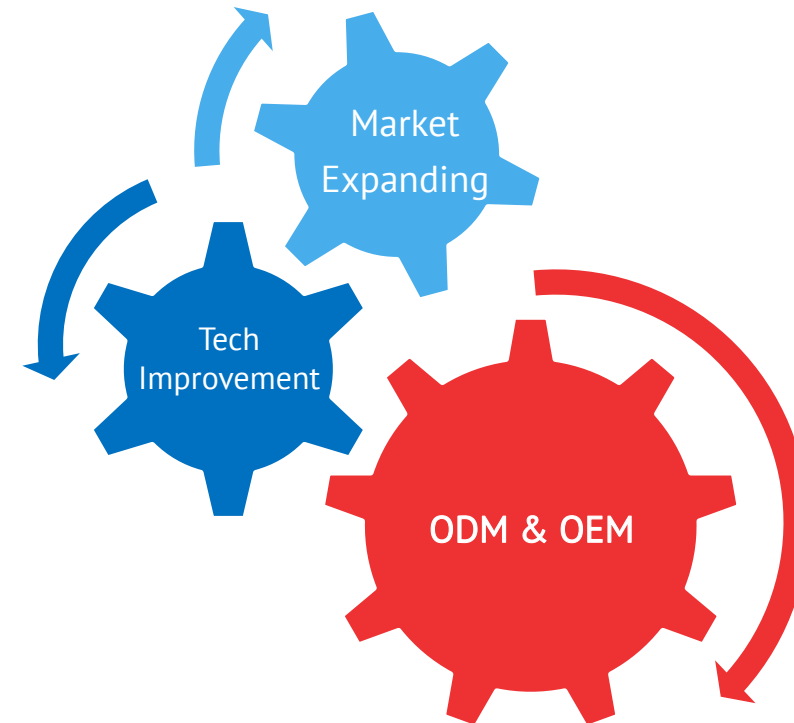

ODM business

We are having more and more trust from some big companies or Organizations, with the information from end researchers, we would develop new items.

We think OEM or ODM is very interesting, it help us to know how researchers working and where their needs is.

G2 PCR series

PCR plates & 8 tube strips

Liquid handling

Pipette tips & serological pipettes

**For future, We Looking
Forward to solving
more small problems
for researchers.**

Tubes from 0.5mL to 50mL

Centrifugation

Cryogenic tubes
Cryogenic storage
