5mL & 10mL Filter Pipette Tips

ISO 9001

Features

With wide compatibility, these tips are crafted to fit popular single-channel pipettors like Dalong, Brand, Eppendorf, and others.

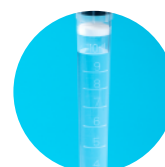

The tip provides outstanding clarity and includes well-defined graduations, simplifying the process of observing during pipetting.

These tips are manufactured using high-quality polypropylene, guaranteeing outstanding resistance to chemicals.

The integrated filter isolates aerosols, effectively preventing cross-contamination.

Sterilized, free from DNase, RNase, DNA, heavy metals, and pyrogens.

Raw Material

The tips are crafted from polypropylene, and the filter within them is constructed using polyethylene.

On the other hand, the rack is manufactured from polycarbonate.

Application

5mL and 10mL filter pipette tips are frequently employed across diverse laboratory tasks that demand meticulous and controlled manipulation of substantial liquid volumes. These tips find widespread applications in various fields, including cell culture, sample preparation, protein purification, serological testing, and more.
