

DATA SHEET

Sealing Mat for Deep Well Plates

ISO 9001

Features

Tailored to accommodate 96-well plates.

The sealing mat fits securely within each well, guarding against the evaporation of volatile samples and cross-contamination.

Sterile and devoid of Dnase, Rnase and human DNA.

Raw Material

They are made from premium-grade silicone.

Application

Sealing mats are designed to snugly fit on top of deep well plates, acting as protective shields that cover the plate's wells. This mechanism effectively averts contamination, evaporation, and the potential for cross-contamination. The spectrum of applications for these sealing mats includes safeguarding samples, preventing cross-contamination, ensuring assay uniformity, enabling extended storage, and much more.
