Produced in a 100,000-level dust-free workshop.

### Raw Material

Manufactured of Optical-grade polystyrene (PS) using diamond polished molds.

The filter is made of Polyethylene (PE).

**We Open To New Ideas!**

### Application

Serological Pipette is a disposable plastic graduated pipette. Originally developed as a pipette.

As a substitute for glass pipette, the pipette is called serum pipette because of its irreplaceable role in sterile serum transfer medium. It is widely used in tissue culture, bacteriology, clinical, scientific research and other fields requiring aseptic operation of liquid transfer.
