\*Hamilton® Microlab® VANTAGE Liquid Handling System®, STAR™ and NIMBUS® are registered trademarks of Hamilton Company

Guaranteed sterile, free from Dnase, Rnase, and pyrogenic contaminants.

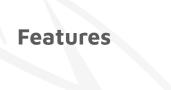

### Features

Made in high-quality medical-grade polypropylene.

Compatible with various Hamilton® workstations, ensuring extreme accuracy and precision.

**Raw Material** 

**Application** 

within these systems.

Offers a wide range of automation tips to suit different needs, including conductive, and filtered options.

The tips are made in conductive black or clear polypropylene.

The filters of filter tips are made of Polyethylene.

Automation tips are vital for precise liquid handling in laboratory applications. Typically, these tips work in tandem with automated liquid handling systems to execute essential tasks including sample preparation, liquid handling, and various other operations. Specifically designed for compatibility, these robotic tips are predominantly utilized in advanced Hamilton® pipette stations such as the Microlab® VANTAGE Liquid Handling System®, STAR™, and NIMBUS®. Their exceptional compatibility ensures optimal performance
