

DATA SHEET

Wide Bore Pipette Tips

ISO 9001

Features

The wide orifice helps keep delicate samples safe by lowering the force, great for dealing with thick stuff.

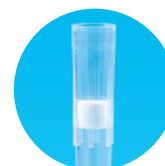

Made of polypropylene, it's tough against chemicals.

Compatible with a variety of widely-used pipettes.

The tip's filter effectively prevents cross-contamination.

It's sterilized and clear of Dnase, RNase, DNA, and pyrogens.

Raw Material

The tips are made from medical-grade polypropylene, while the filter in the tip is constructed from polyethylene.

Application

Wide bore tips, also known as large orifice tips, are the go-to choice in labs for tackling thick or dense liquids, like proteins, gels, and genomic DNA. They're especially handy for pipetting high-viscosity samples, working with cell cultures, and handling protein and DNA tasks. These tips are essential for the routine processing of samples, making them a practical choice for a variety of laboratory applications.
